RE: Priority of VANTAGE Menthol

As you are aware, Marketing/TD projects have recently been recategorized and several were identified as Category 1 with critical timetables established. Included was a program to reduce the tar and to convert the filter of the VANTAGE family to conventional cellulose acetate. VANTAGE Menthol was not specifically listed among the Priority 1 projects; however, it is important that this product be given that priority because the menthol level commensurate with the new filter must be established. Therefore, please add VANTAGE Menthol to the Priority 1 list and ensure that it is treated accordingly.
